### Background

What makes Pride Mountain Vineyards' wines and winery distinct is the location of our eighty-five vineyard acres that are draped across the gentle rolling crest of the Mayacamas Mountains some 2000 feet above the floor of the Napa Valley.

Vines receive roughly 27% more ultraviolet light compared to vines in level vineyards on the surrounding valley floors. Having more light on the grapes results in tannin and phenolic anti-oxidant levels in our red grapes that are measured to be roughly 25% higher than red grapes in the surrounding valleys; this is the main contributor to the broad-shouldered "mountain character" Pride Mountain's red wines possess.

### Tasting Notes

Classic mountain cab, this wine expresses cassis, chocolate, black cherry, mint, coffee and black tea notes. The palate is lush and uber-concentrated, with just enough acidity to add a liveliness to the texture and plenty of supple tannin for both a long smooth finish and long-term aging potential.
